

Installation of free products

# For your business

## Simple solutions for energy savings

energySMART, a Nicor Gas program, installs free products for small business owners looking to reduce their energy use. We install simple solutions to optimize your energy use and boost your bottom line, so you can stay focused on what's important: running your business.

On average,  
businesses that  
receive installation  
of energy-saving  
products save  
\$311 per year.

### An Energy Advisor may install the following free products:

- **Pipe insulation**  
Pipe insulation helps hot water pipes retain heat and deliver water at the correct temperature. The less energy used to heat your water, the less you spend.
- **Salon sprayer**  
A salon sprayer increases the velocity of the water emitted in order to reduce total water consumption during rinsing and cleaning.
- **Pre-rinse spray valve**  
Energy-efficient pre-rinse spray valves are designed to use less water to remove food waste from dishes prior to dishwashing.
- **Showerhead**  
An energy-efficient showerhead uses less water without impacting shower time. When you use less water, you also use less energy to heat it.
- **Faucet aerator**  
Bathroom faucet aerators provide a full stream of water while using less; saving 55 percent more water and energy.

### Assistance to help you achieve your energy goals

We provide the technical assistance you need to identify and research energy efficiency projects and provide you with rebates or custom incentives to help pay for them.

### Eligibility requirements

Business must be a Nicor Gas customer that is not publicly funded.

### Participation is easy

1. Call **877.886.4239** to schedule an appointment for free installation of energy-saving products.
2. Enjoy your savings and start thinking about other energy efficiency improvements for your business.
