

Air seal and insulate your home to increase comfort and save energy

Plus receive rebates from energySMART, a Nicor Gas program, and ComEd Smart Ideas® Energy Efficiency Program.

Air seal and insulate

Air seal to reduce leaks	Rebate up to \$400 per home
Air seal and insulate your attic to maximize comfort and savings	up to \$800 per home

Air sealing: \$0.40 per CFM50 reduction, up to \$400 per home • must achieve a 20 percent reduction in CFM50*

Attic insulation: \$0.30 or \$0.50 per square foot insulated depending on existing insulation levels, up to \$400 per home
• must complete air sealing to qualify • existing insulation may not exceed R30 • must insulate up to R49

*Your contractor will use an industry standard protocol to determine CFM50 before and after air sealing. CFM50 is a measurement of air flow in your home when pressurized according to the protocol. The reduction measures the improvement in the air-tightness of your home.

Enhance your rebate with additional insulation

Wall insulation	Rebate up to \$400 per home
-----------------	--

\$0.50 per square foot of insulation, including exterior, foundation sidewall, knee wall and skylights • rebates are only available when completed with qualifying air sealing and attic insulation projects • existing insulation must be less than R5, or new insulation must be added to an uninsulated wall cavity • walls must be insulated to at least R13, in compliance with state or local code, whichever is higher

Improve whole-home efficiency

Seal ducts to increase the efficiency of your heating and cooling system	Rebate \$300 per home
--	--

60 percent of ducts must be located in unconditioned space • all accessible ducts must be sealed

All work must be completed by an approved contractor who will provide the rebate as an instant discount off of the eligible customer's purchase price.

Rebates are available for qualifying projects installed and completed June 1, 2015 to May 31, 2016.
